

Get Organised™

TIME TO GET ORGANISED

A tool control system designed to maximise efficiency

STREAMLINE YOUR WORKFLOW

A tool solution developed
to make your job easier

No more searching for tools

Nothing is more frustrating than wasting time looking for the right tool for the job. Organising your tools in suitable storage will help you to streamline your workflow and increase the job satisfaction.

Get Organised™ for a better workflow

The TengTools Tool Control System offers more than 240 modular tool sets that fit into a wide selection of storage solutions from large cabinets and tool box combinations to small portable service cases. This makes it easy to create a bespoke tool kit that suits your exact needs.

Benefits of a well organised tool solution

INCREASED EFFICIENCY No more time wasted searching for tools and a more streamlined workflow reduces the total time needed to get the job done.

IMPROVED QUALITY Always having the right tool at hand prevents material damage (e.g. deformed screws and bolts).

REDUCED COSTS With our tool control system you don't have to waste money on tools you don't need and will lose less tools resulting in lower replacement costs.

IMPROVED SAFETY With a well organised tool kit it is easy to spot if any tool is missing. It ensures that no tool is left behind that can cause damage to machinery or injuries to personnel.

SUSTAINABILITY One of the most important reasons to get organised is to minimize the amount of lost tools that you have to replace. That is sustainability in a nutshell.

GET ORGANISED IN THREE EASY STEPS

Tailor your tool solution to your needs

Build your ultimate tool kit with our large selection of storage solutions and tool sets. Don't waste money on tools you don't need. When you can purchase the exact tools you require you save money and maximise space in your tool storage solution.

How to get started

- Evaluate what type of storage solution you require
- A tip is to buy a slightly larger storage than what you currently need so your tool kit can grow with you
- Decide if you need tool sets in the premium feel Foam Series or in the space saving TT Series.
- Choose the exact tools that you need in a combination that fits into your chosen storage solution
- Our system is expandable and you can add new tool sets to your kit as new needs arise. You can also buy individual tools
- Our Tool Control System is modular so all tool sets can be transferred between different storage solutions. You can easily take a tool set from your workshop stack to your portable service case

1

CHOOSE YOUR STORAGE

Storages for all needs.

2

CHOOSE YOUR TOOL SETS

Your kit. Your way.

3

ORGANISE YOUR KIT

Optimise your workflow.

PORTABLE

Fully organised, shock-proof and durable service cases for on-the-go jobs.

TOP BOXES

Perfect for storing on a countertop or shelf.

A great starter option and as your tool kit grows it can be stacked on top of a cabinet.

CABINETS

Ideal for any workshop or factory floor.

Roll your full toolkit around to where you are working and use the top of the cabinet as a handy work surface.

STACKS

Maximise your space.

Roller cabinets and top boxes stacked creating a full tool storage solution on wheels.

Solutions are available in 26", 37", and 53" wide storage units.

WORKSHOPS

Build your ultimate workshop.

Combine workshop modules to create a fully organised work space that boosts efficiency and creates a safer working environment.

CHOOSE YOUR STORAGE

1

Portable service case, mobile tool cabinet or workshop

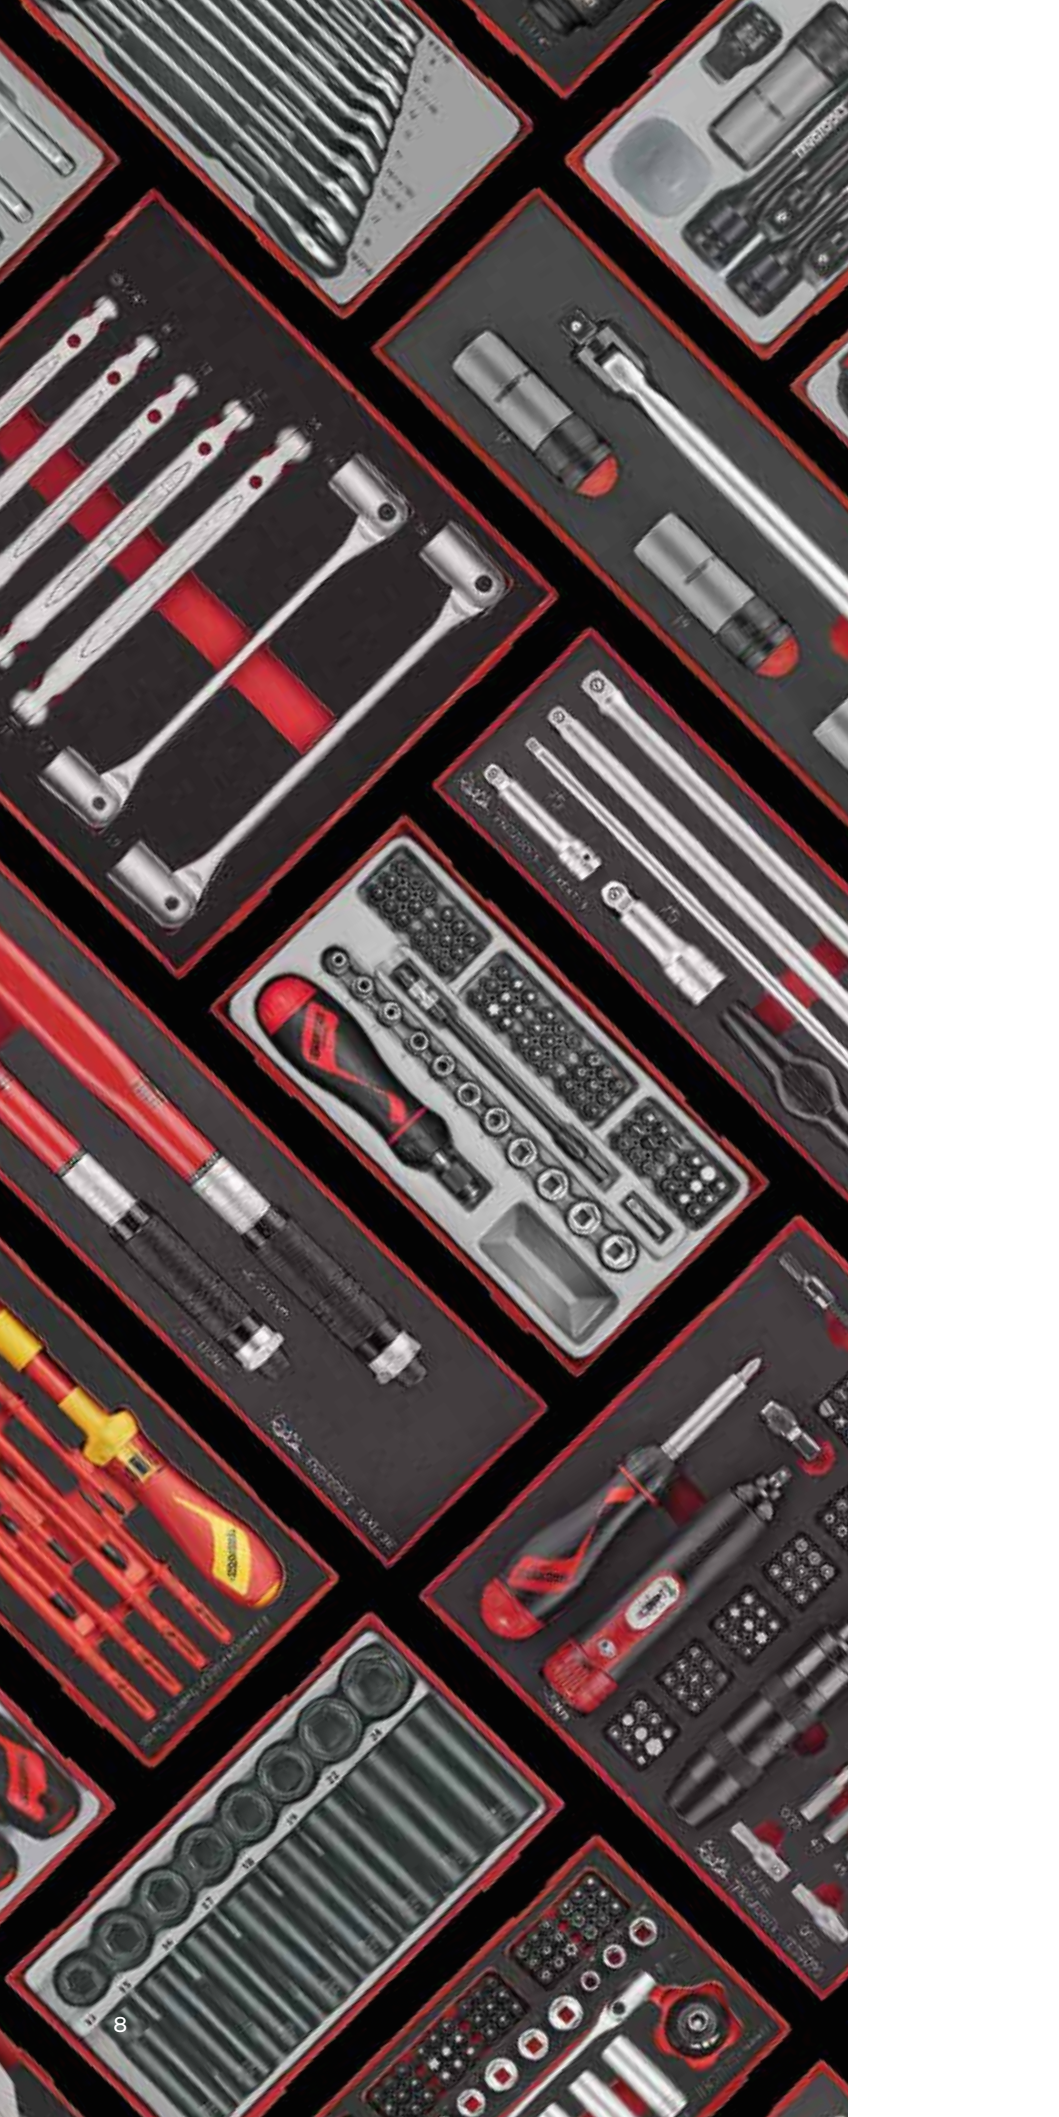

To optimise your efficiency you need to decide what tool storage solutions you need. If you need your tools to be fully organised on the go you should choose a service case or top box but if you require a lot of tools to be easily accessible at all times then a mobile tool cabinet or stack system would be the best option.

With our modular system you can start small with a service case or top box and as your requirements grow your tool storage can grow to a fully organised workshop workshop solution.

Built to last

Our portable service cases are shock-proof and durable, made in recyclable plastic. Our tool boxes and cabinets have been manufactured from heavy gauge steel and powder coated with a 5-step rust prevention. They have been tested in extreme conditions and exceeded the demands of professional users all over the world.

CHOOSE YOUR TOOL SETS

2

A flexible tool control system with over 240 tool sets

With a selection of more than 240 tool sets it is easy to create a bespoke tool kit that suits your exact needs.

TT Series

The TT Series offers a space-saving tool control system allowing you to fit more tools in each drawer. With our wide assortment you can build some of the largest tool kits in the market, with over 1000 tools in a 26" wide stack. The tool trays are made of recyclable plastic that is easy to clean and they are ideal for use in dirty or high moisture environments.

Foam Series

The Foam Series offers the ultimate tool organisation. Each tool has its own place with its description imprinted in the 3-coloured foam. The contrast colours makes it easy to identify tools and see when a tool is missing. The high quality foam stays soft and flexible even in cold environments and gives the tool kit a premium look.

A modular system that fits all storages

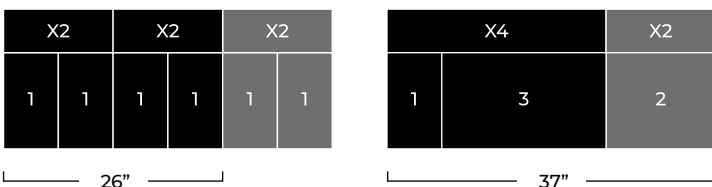

Our tool sets are available in different sizes (1-4 and X2-X4). These can be combined to fit perfectly into your chosen storage solution, regardless of whether you have a storage that is portable, 26, 37 or 53 inches.

ORGANISE YOUR KIT

How to keep your work shop in perfect order

With TengTools you'll have a great foundation for getting organised and increasing efficiency. But to stay organised you need to develop a common approach and a clear standard of cleaning and structure, which everyone in the workplace understands and follows with a high level of discipline.

SORT EVERYTHING Distinguish between tools for everyday tasks and tools you use more seldom! Create a "red place" where you put all tools that are not continuously used on the workstation. These should be stored in a separate tools store, where they're easy to find without messing up your daily workplace.

STRUCTURE AND PLACE A place for every thing and everything in its place! To minimize the need to stretch or move unnecessarily far, all tools that are continuously used at a workstation should be placed within reach, and in the right place.

TIP! With every tool set you get a sticker with a picture of the set. If you put them on the drawer you'll know exactly what's in each drawer and where to put tools when you're done.

3

Clean to always be ready

STANDARDISE One of the most important habits with our system is that all users check after each job if the tools are put back in the tool box. With our system it is easy to check if there is anything missing and then look it up before going home or moving to the next job, ensuring that the tool kit is complete for the next one using it!

CREATE HABITS Always look for continuous improvement. Create checklists, schedules, instructions and more to help you remember what to do, when and by whom.

TIP! Use our tool set stickers or take a photo of tool kits and workplaces when they are in the condition you want them to be. Hang the photo in the workshop so that all employees can see it. Set a specific date at the end of the month when carts and workplaces are to be cleaned and sanitized. And when it's done, everything should look exactly like it does in the photo.

Why TengTools:

- High quality tools proven to be better than most leading brands in independent tests
- A wide range of tools manufactured to exceed industry standards
- Tools built on innovations that make a difference in safety and efficiency
- A tool control solution that you can tailor to suit your exact needs
- A tool control system that helps you Get Organised and improves your performance
